## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-19, 52, 56-58, and 60-62 drawn to a method of making a dielectric layer, classified in class 438, subclass 758+, 785.
  - II. Claims 20-31, 54-55, and 59 drawn to a method of making a MOS transistor, classified in class 438, subclass 216, 287, 585, and 591
2. Inventions Group I and Group II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because both the combination and subcombination are presented and assumed to be patentable, and it is evidence that the combination, MOS transistor, is patentable by itself. In addition, the subcombination, dielectric layer, has separate utility such as but not limited to gate dielectric or capacitor dielectric layer.
3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
